DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species:

I Claims 1-4 and 9-13: matching the spectral dependence of a monitor of amplitude fluctuations of a multi-line laser source to the spectral dependence of a desired signal, forming a matched monitor signal; subtracting the matched monitor signal from the desired signal.

II Claims 5-8 and 19-20: passing a portion of the output of a multi-line laser through a spectrally flat optic, forming a laser monitor signal; monitoring the desired signal; adjusting the intensity of the laser monitor signal so that laser amplitude fluctuations in the desired signal and the laser monitor signal are equal, forming a corrected signal; subtracting the corrected signal from the desired signal.

Claims 14-16: a laser cavity having output along a laser beam axis; an output coupler coupled to one end of the laser cavity along the laser beam axis; an optional compensating optic in optical communication with the output coupler; an output detector in optical communication with the compensating optic; a gain adjusting element in electrical communication with the output detector; a scattered light detector at a selected angle away from the laser beam axis; a differencing junction in electrical communication with the gain adjusting element and in electrical communication with the scattered light detector.

Application/Control Number: 10/622,023

Art Unit: 2828

IV Claims 17-18: passing a portion of the output of the multi-line laser through a spectrally flat output coupler, forming a laser monitor signal; comparing a desired laser output setpoint to the intensity of the laser monitor signal; adjusting the laser output so that the intensity of the laser monitor signal is the same as the desired laser output setpoint; whereby the laser amplitude fluctuation noise in the desired signal is reduced.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 2828

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dung (Michael) T. Nguyen whose telephone number is (571) 272-1949. The examiner can normally be reached on 8:30 - 17:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Min Harvey can be reached on (571) 272-1835. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
